This document provides corrections and clarifications to rules listed in the *Core Manual*. Updated versions may include some or all of the revised text provided here.

## ELDORI

**Draw from the Wheel (pg. 34).** When you use your bonus action to activate this feature, you must choose the type of bonus in advance. It cannot be used as a reaction. The effect of this feature lasts until the end of your next turn.

## HUNTER

### TECH SLOTS

The Hunter table shows how many tech slots you have to use for techniques. To activate a technique, you must expend a tech slot of the technique's rank or higher. You regain all expended tech slots when you finish a long rest.

For example, if you know the rank 1 technique *sensory jammer* and have a rank 1 and a rank 2 tech slot available, you can use *sensory jammer* using either slot.

**Gaining Additional Powers (pg. 79).** At 1st level, you know two rank 1 techniques of your choice from the hunter powers list.

## SENTINEL

**Infused Strike (pg. 94).** Whenever you use your Infused Strike feature, you can choose either Melee Strike or Ranged Strike.

## SPECIALIST

**Intuitive Action (pg. 101).** When you use your bonus action to activate this feature, you must select a target that you can see. That target makes their next attack roll against you with disadvantage. If the attack misses, your next attack roll made against that target has advantage. If the target does not attack you by the end of their next turn, the effect ends.
